OVERVIEW

How the new navigation works

The portal used to list every screen in the sidebar under group headings. It is now organised by module: the sidebar lists the modules, each module opens a landing page, and every screen inside a module has its own sub-navigation bar.

1. Module sidebar

One entry per module with an icon: Dashboard, POS & Orders, Kitchen, Menu, Inventory, Suppliers, Finance, Staff, Analytics, AI Intelligence, Settings. A module appears only when the user may open at least one of its screens, and stays highlighted on all of them.

2. Landing pages

Each module opens a landing page: a header, KPI cards and a tile for each screen. KPIs come from the same queries the screens use, under the user's own permissions; if a figure cannot be loaded the card says "Unavailable" - never a made-up number.

3. Sub-navigation bar

A slim bar above every module screen lists that module's screens with the current one underlined. A screen two modules share keeps the bar the user arrived with (e.g. Finance > Payables keeps the Finance bar).

4. Breadcrumb

The top bar shows "Module > Screen" on every page and links back to the module's landing page.

5. Phones

The sidebar becomes a scrolling module bar under the top bar; the sub-navigation scrolls sideways and keeps the current screen in view.

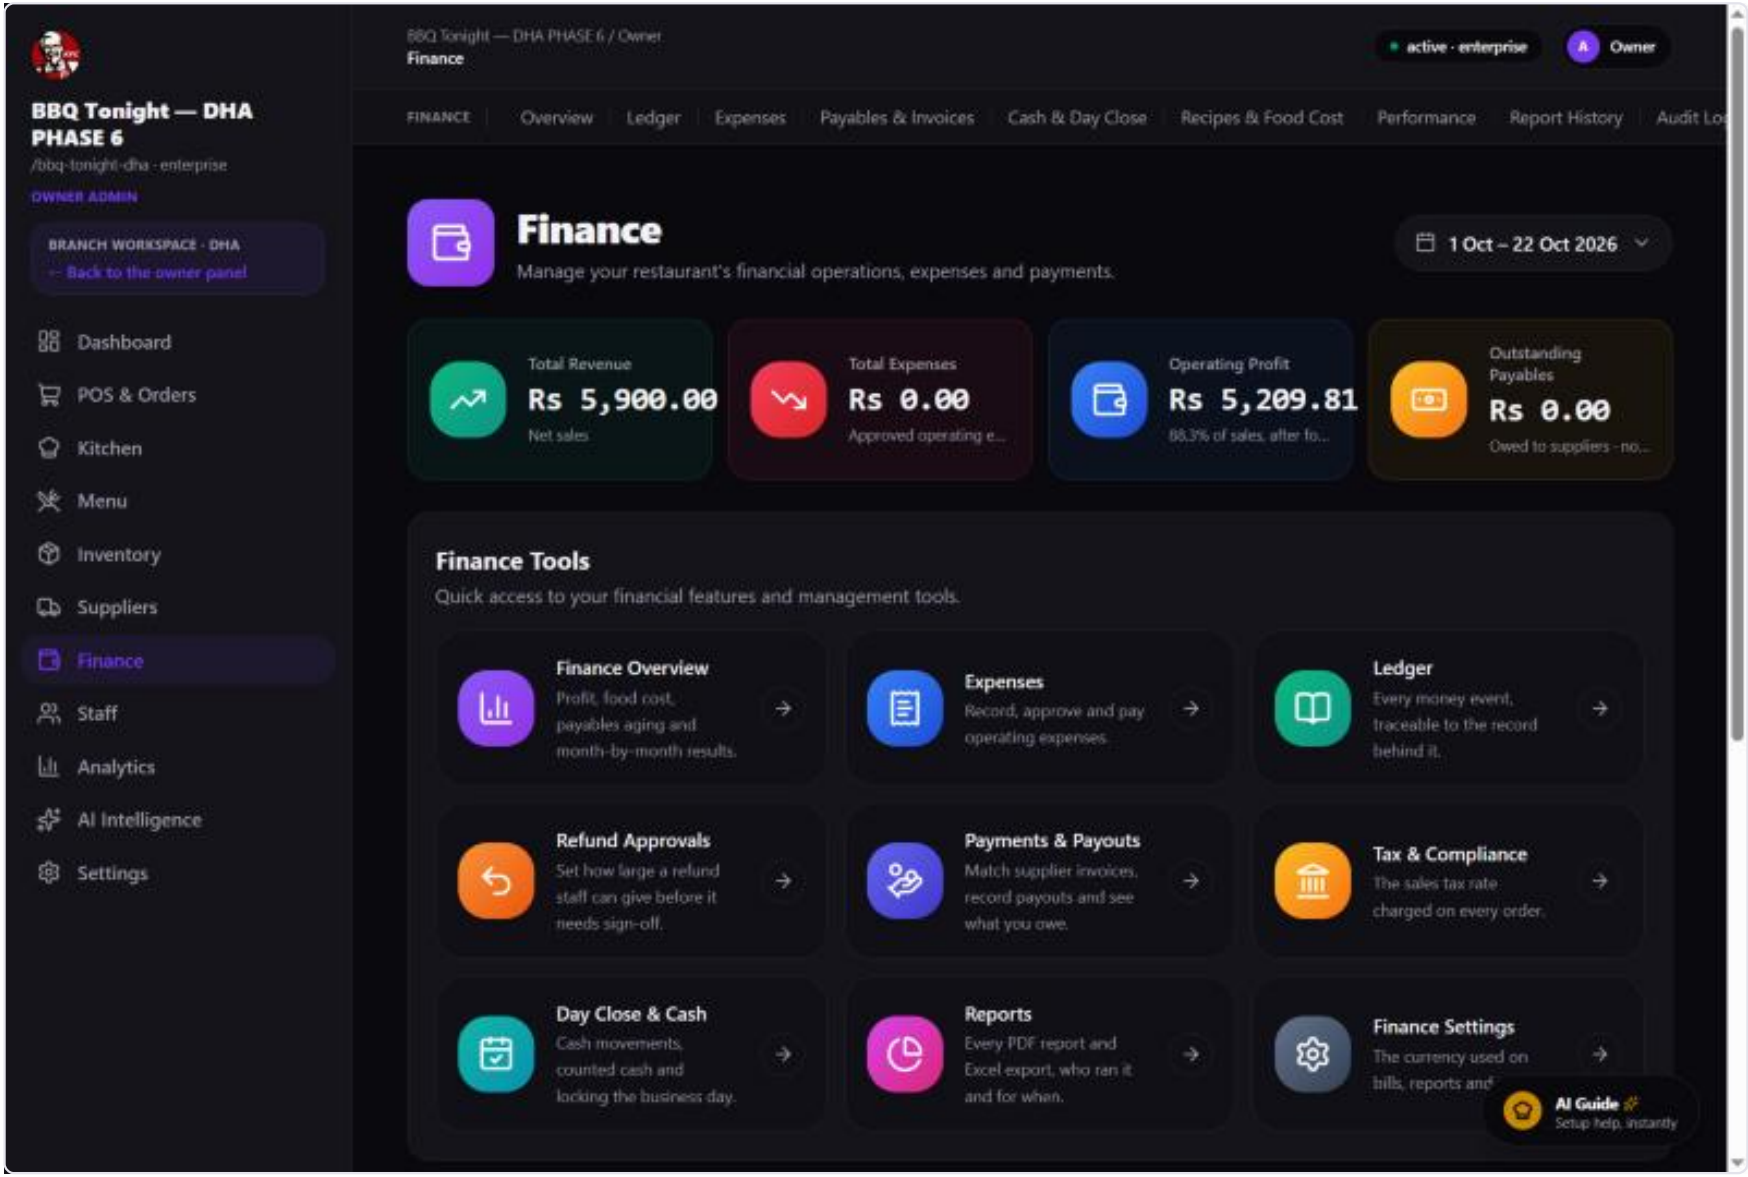

6. Permissions

Every tile, KPI and link carries the permission, owner-only and plan rules of the screen it opens. The owner panel of a multi-branch restaurant keeps its own sidebar.

FINANCE

Finance - landing page

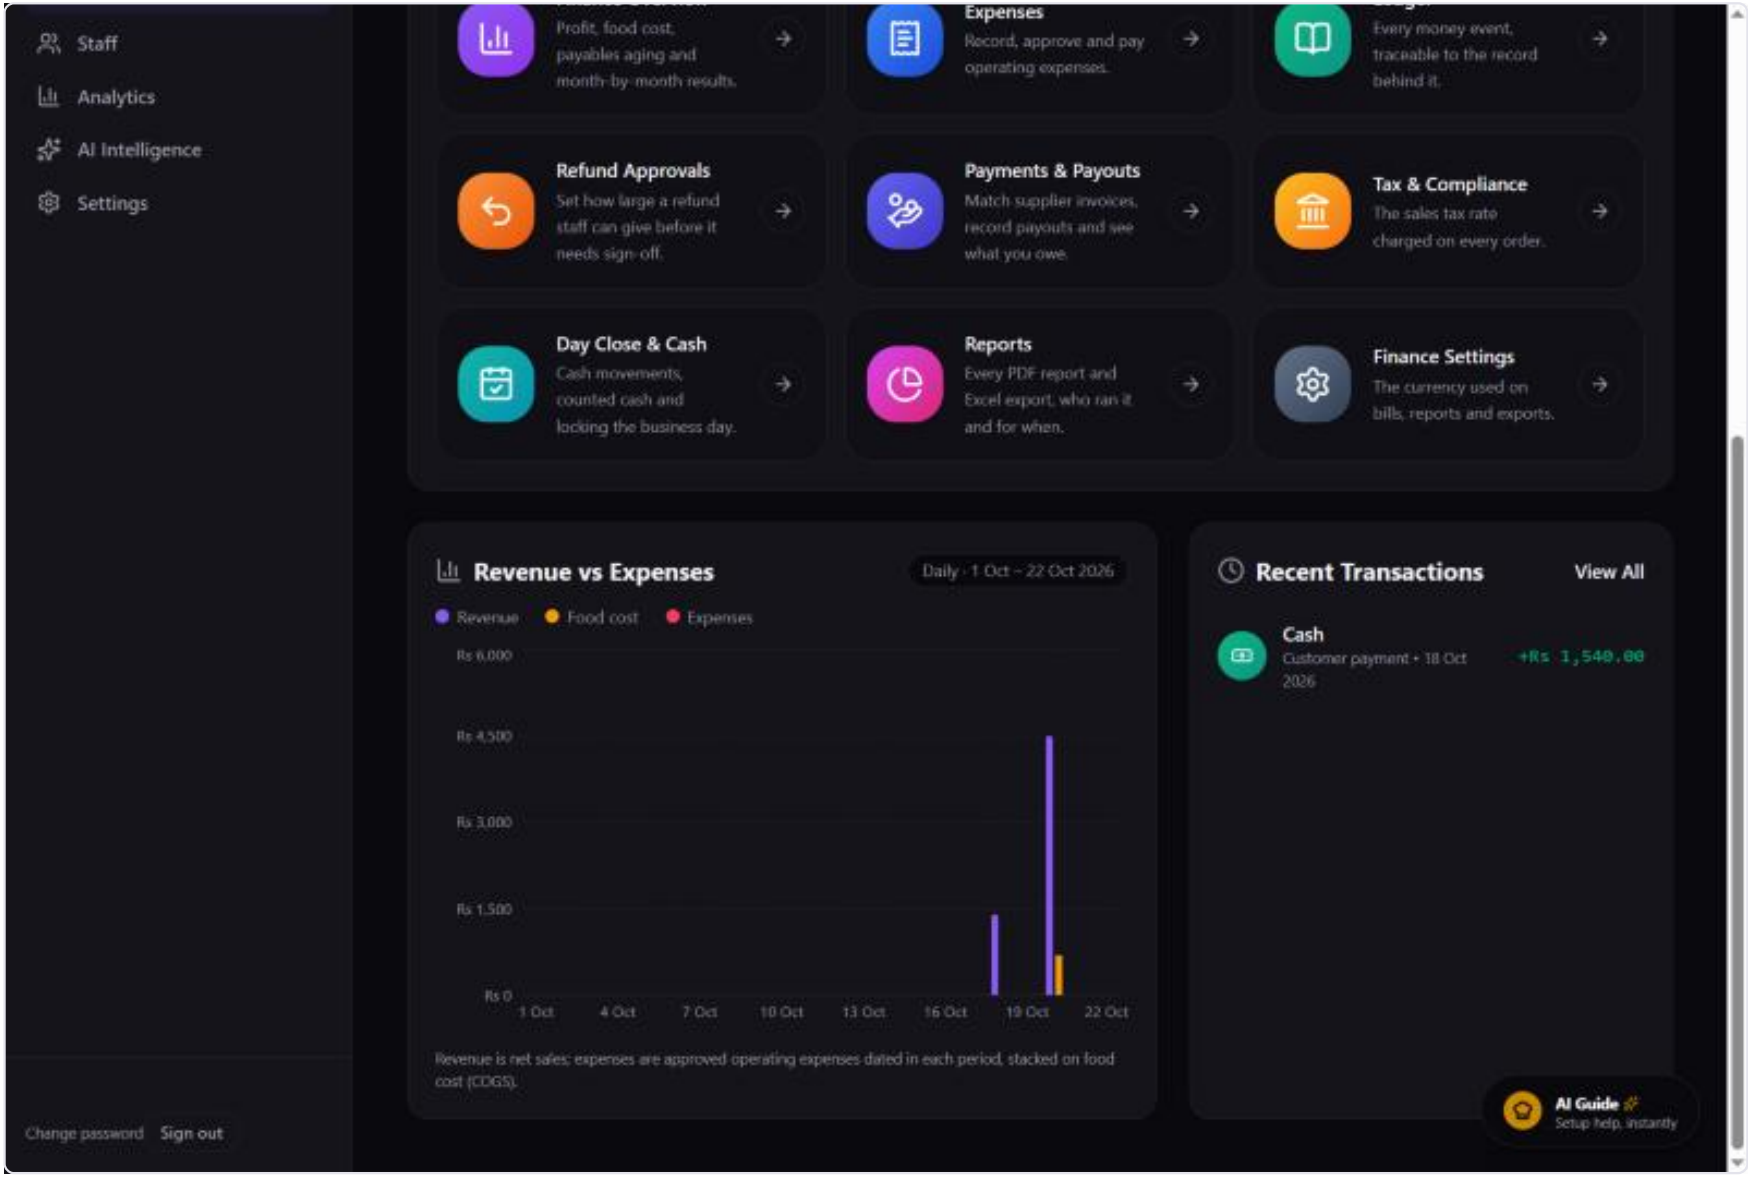

Header with date-range picker; KPI cards for revenue, expenses, operating profit and supplier payables (change badges only against a real previous period); Finance Tools tiles opening each existing Finance screen.

FINANCE

Finance - revenue vs expenses and recent transactions

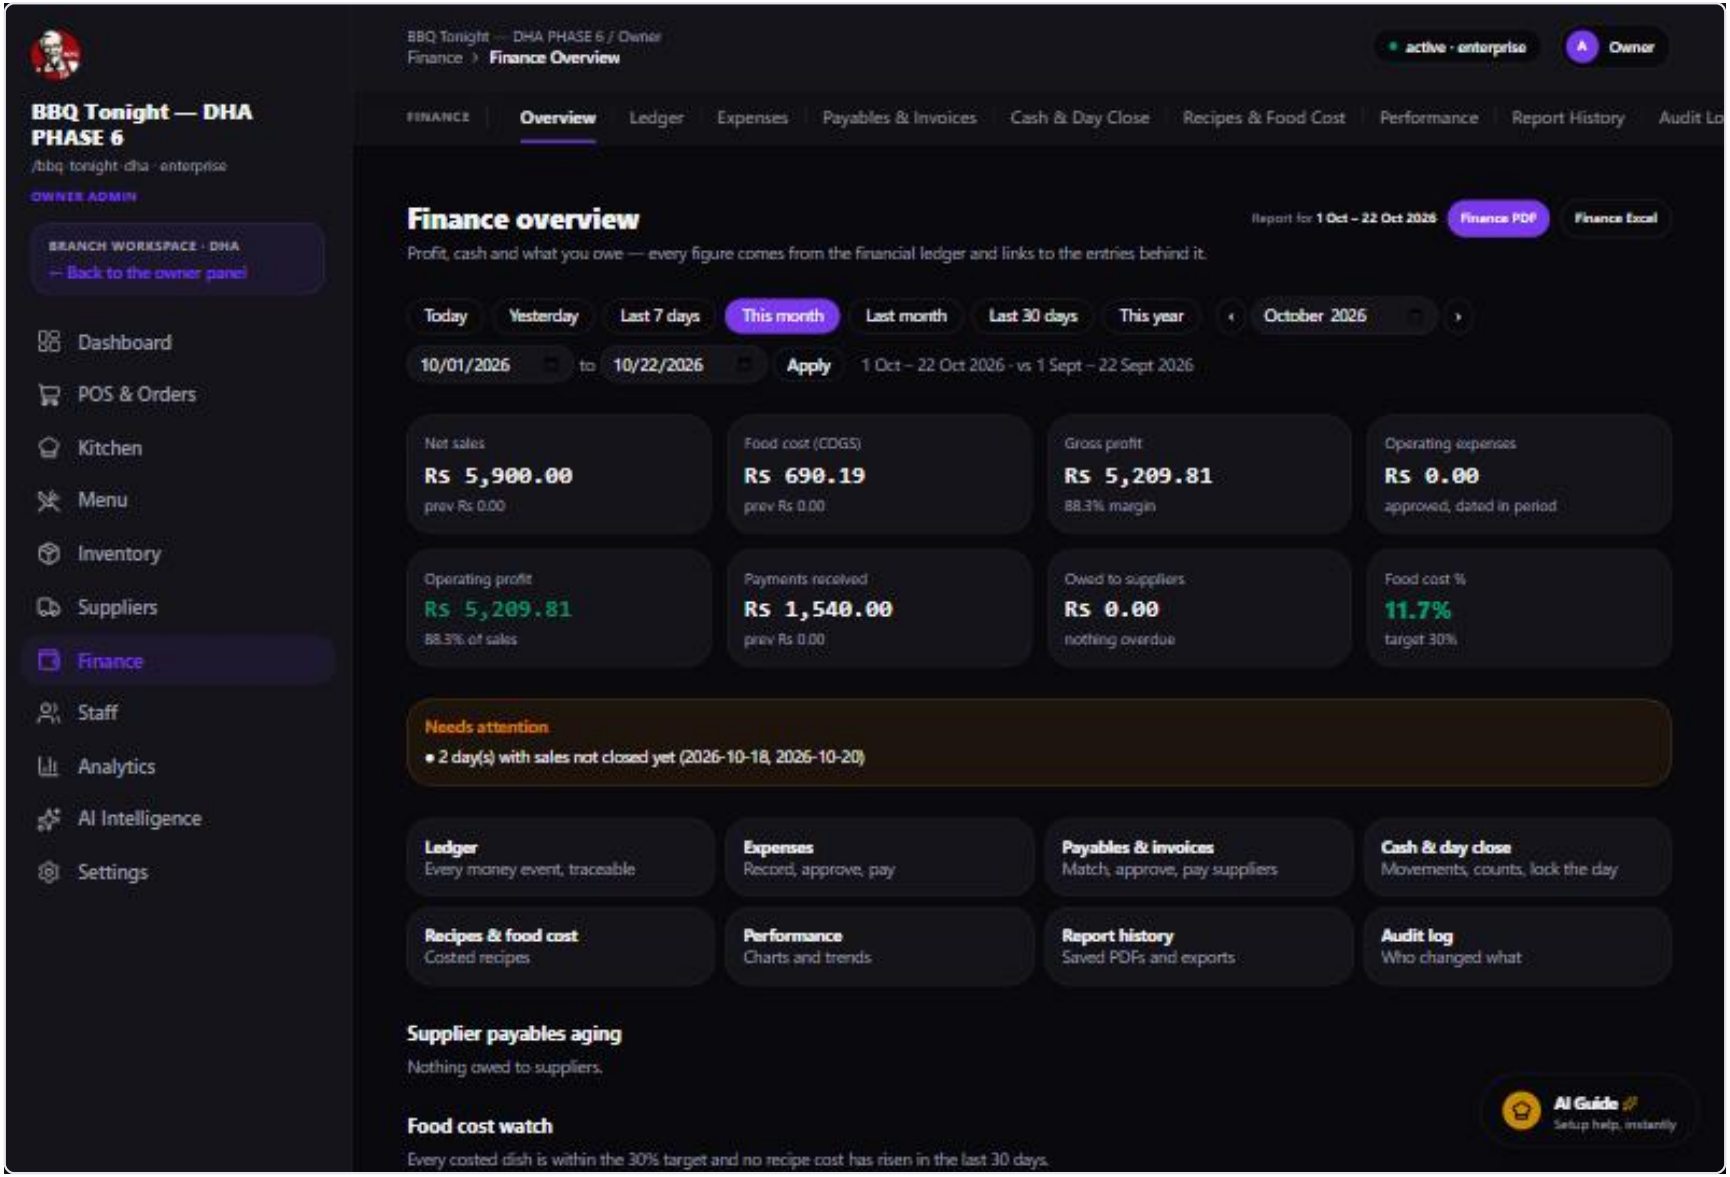

Daily, weekly or monthly bars depending on the chosen range, from the financial ledger. Recent transactions show customer payments, refunds, expenses and supplier bills; "View All" opens the Ledger for the same dates.

FINANCE SUB-NAVIGATION

Finance Overview with the Finance bar

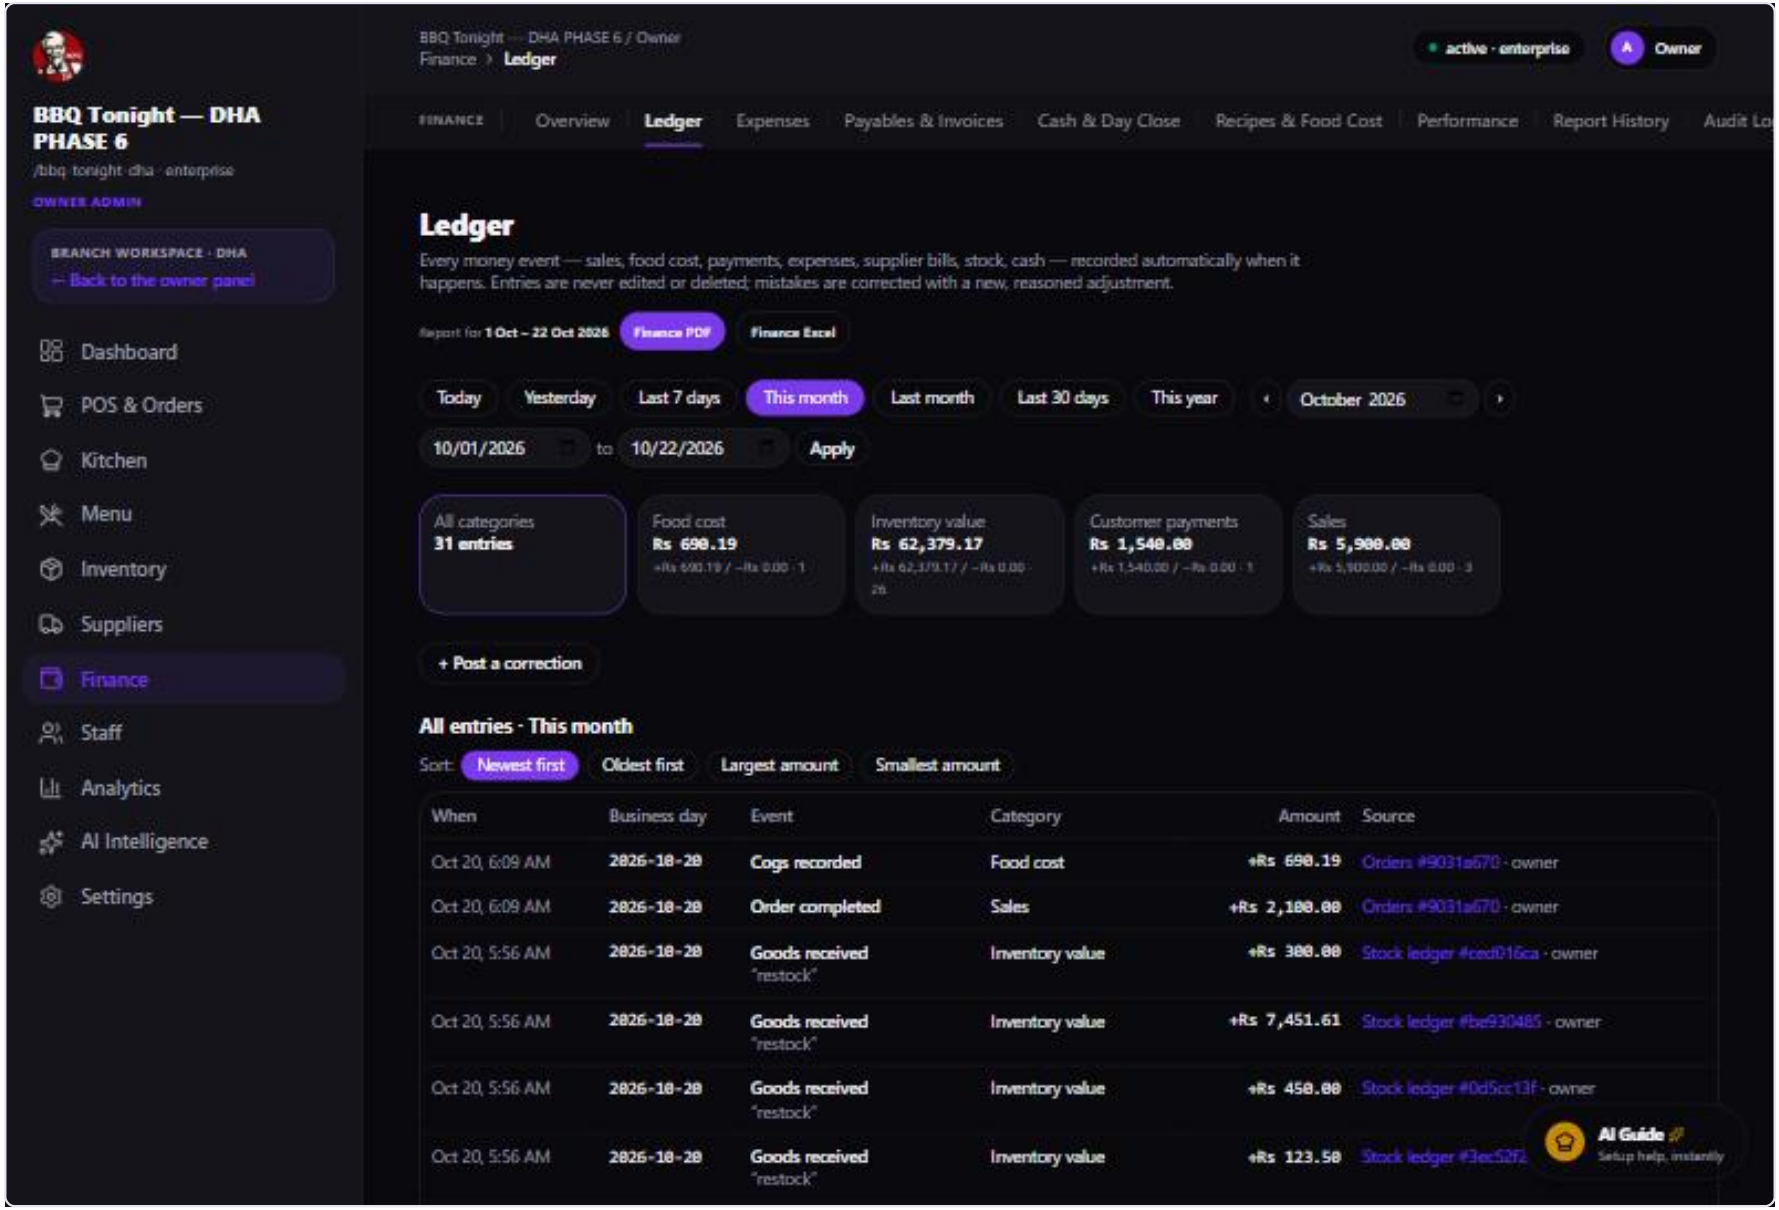

The Finance bar (Overview, Ledger, Expenses, Payables & Invoices, Cash & Day Close, Recipes & Food Cost, Performance, Report History, Audit Log) sits under the top bar; Overview is underlined.

FINANCE SUB-NAVIGATION

Ledger - same bar, Ledger active

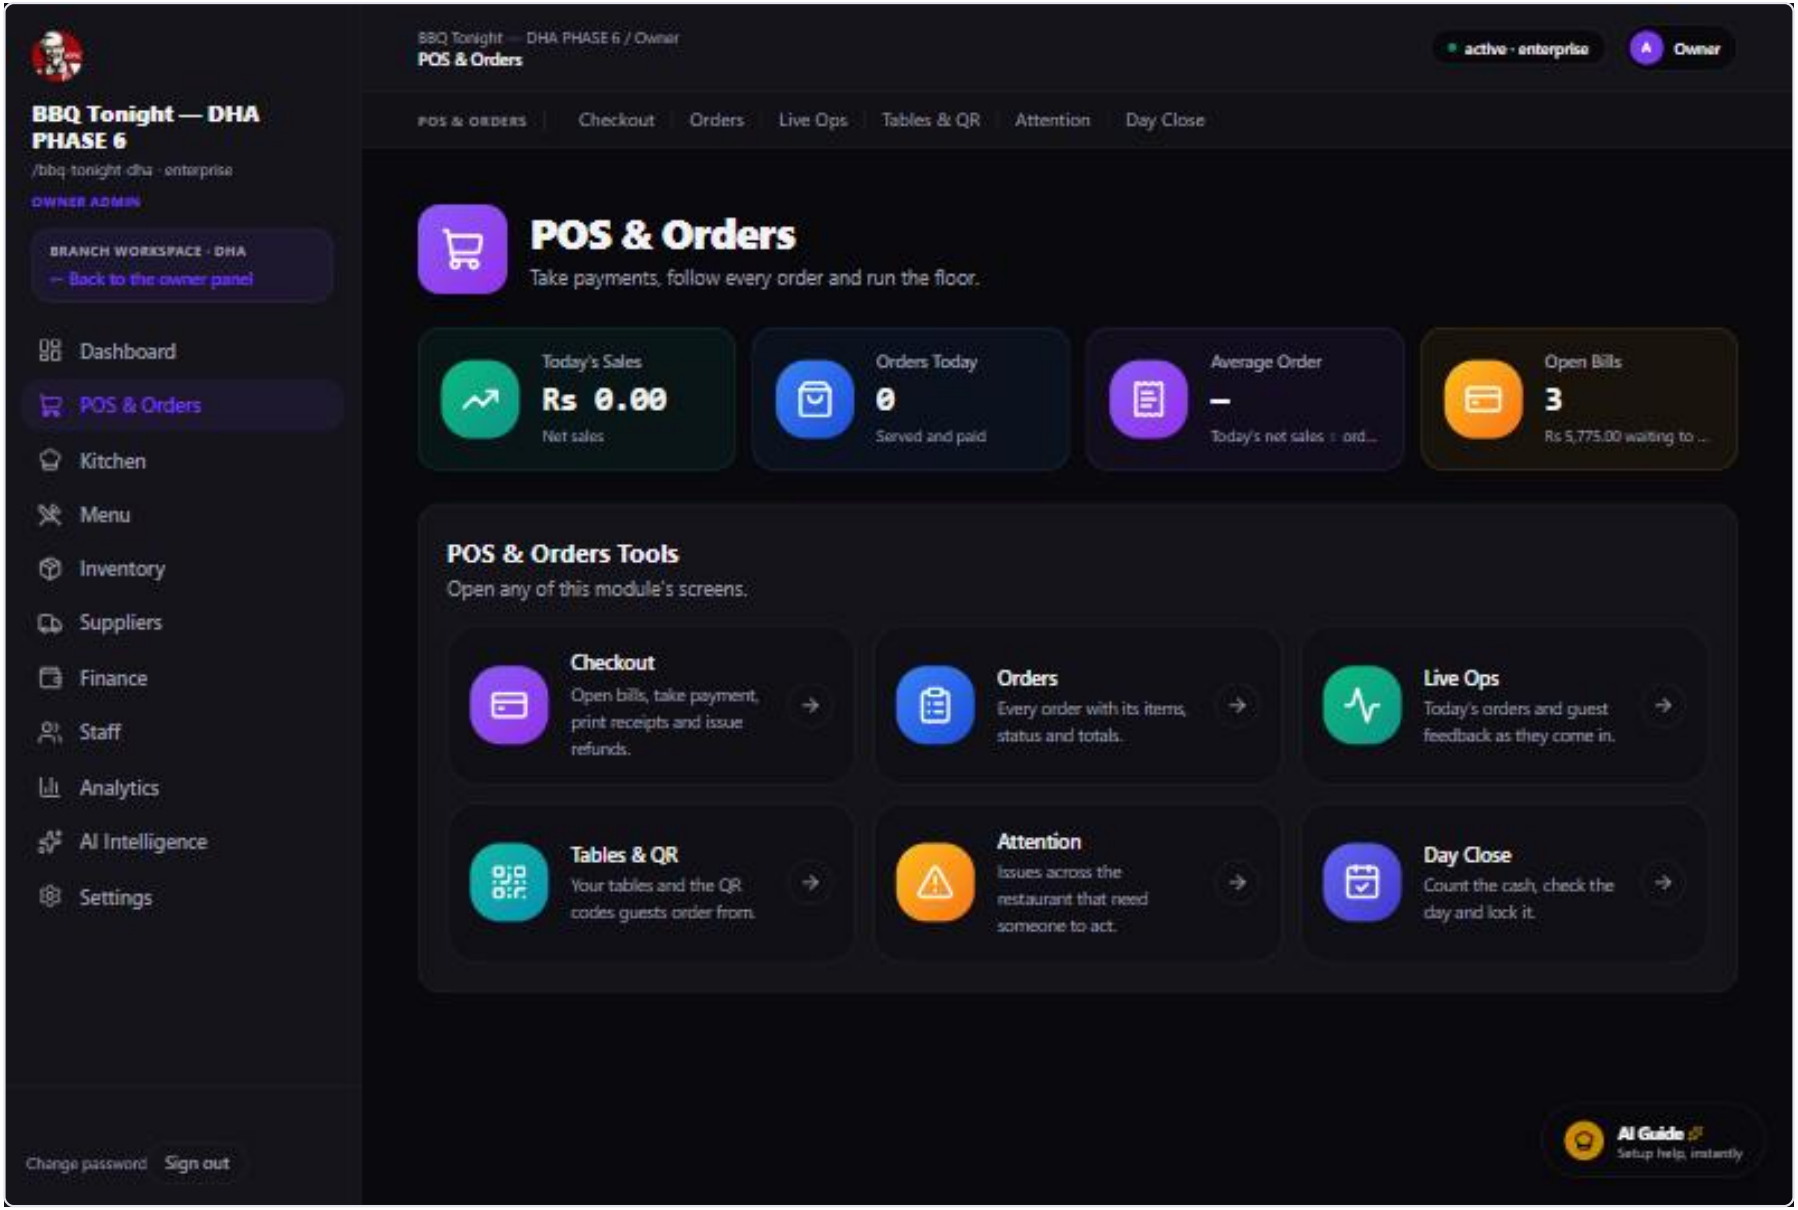

Switching to Ledger keeps the bar and moves the highlight; the breadcrumb reads Finance > Ledger.

MODULE

POS & Orders

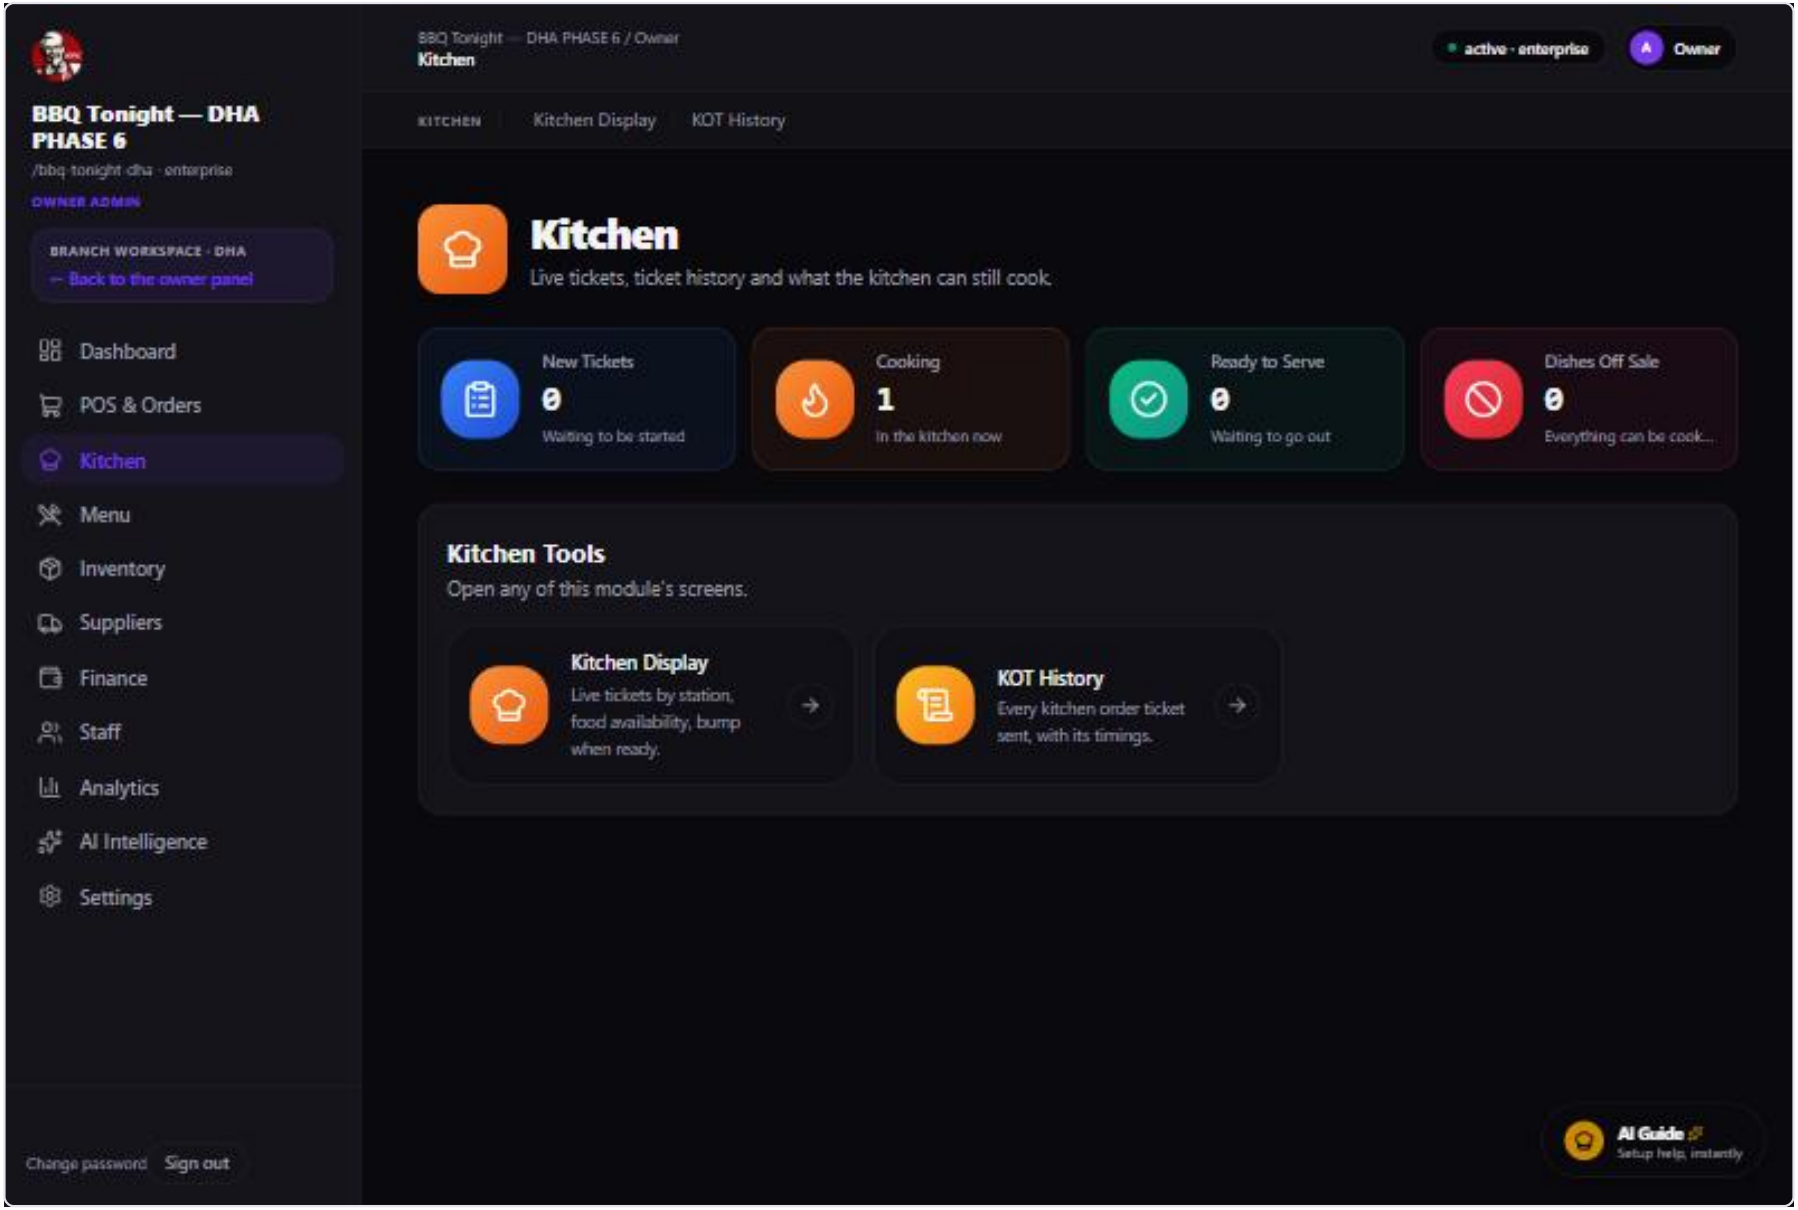

KPIs: today's sales, orders and average order (vs yesterday), open bills. Tools: Checkout, Orders, Live Ops, Tables & QR, Attention, Day Close.

MODULE

Kitchen

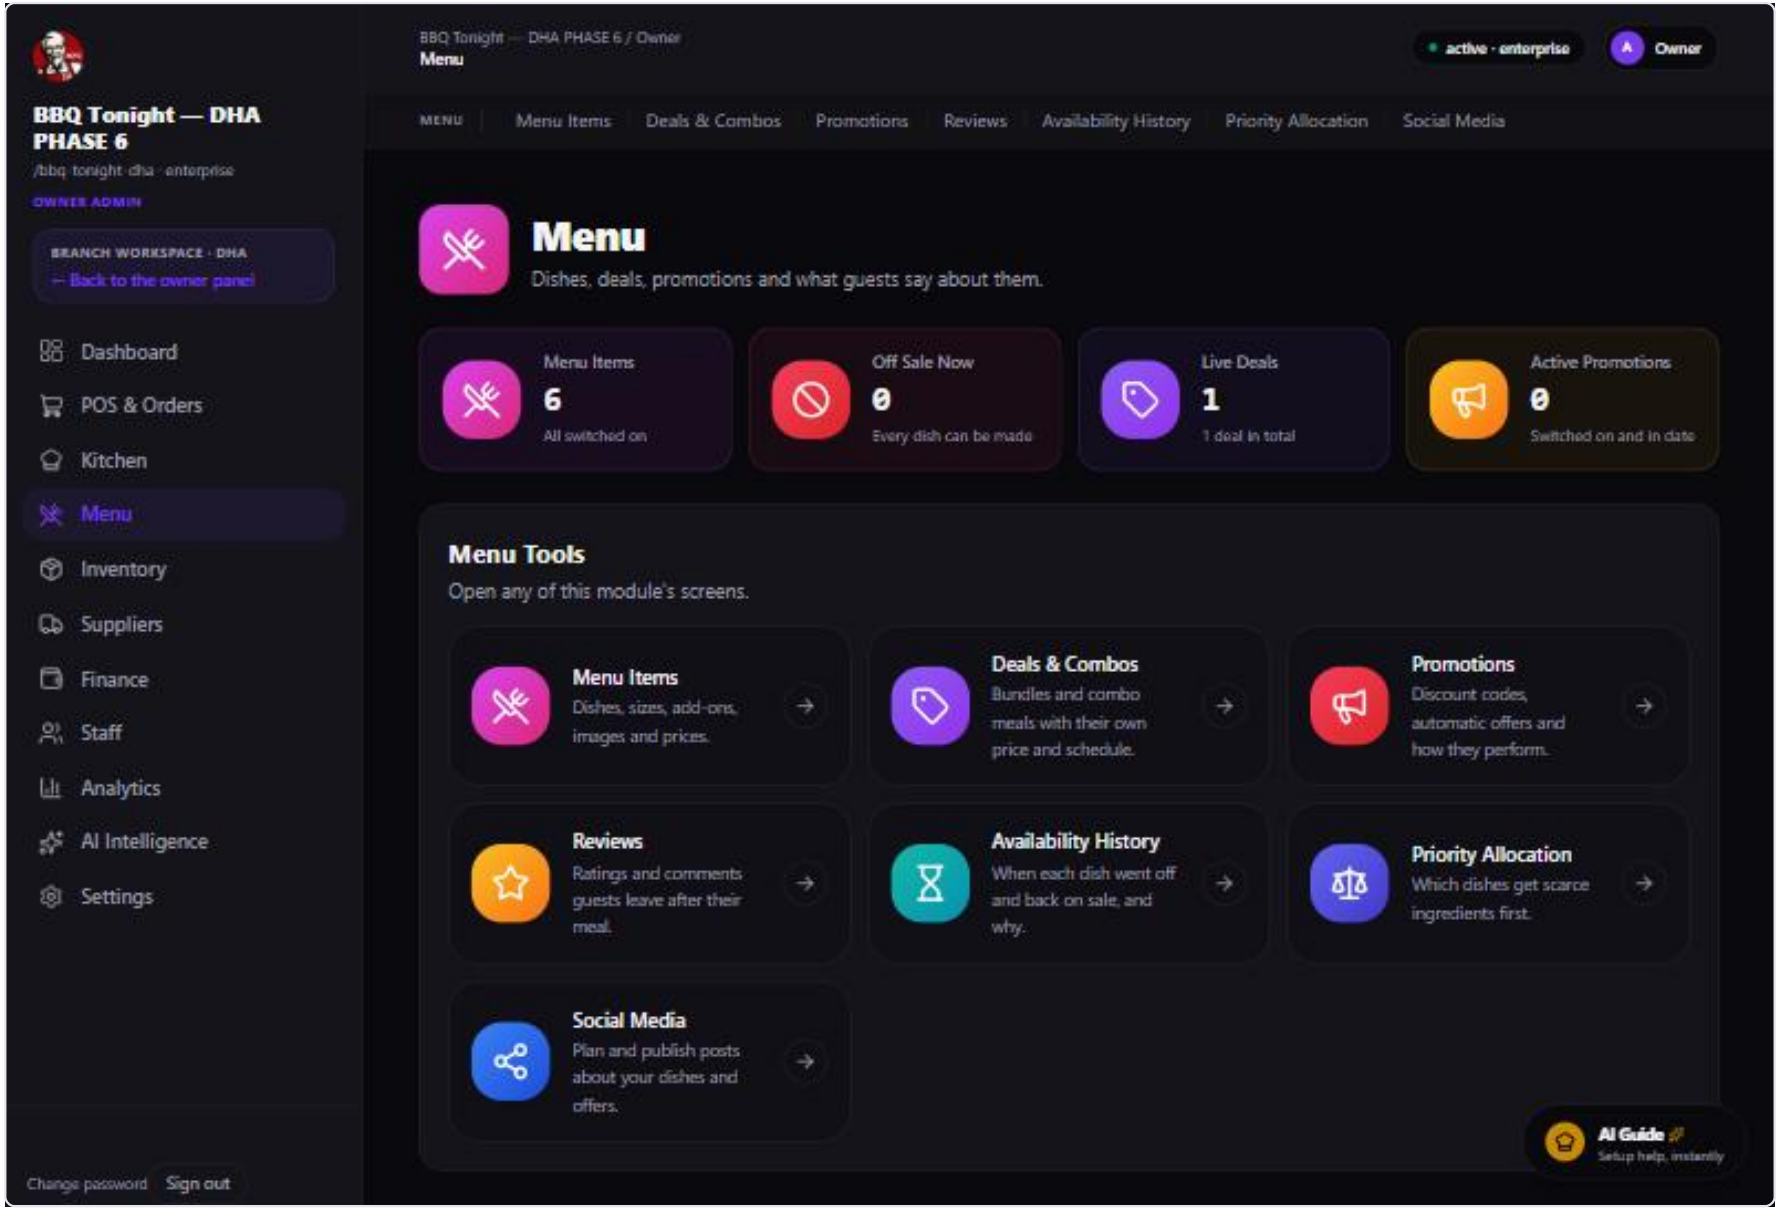

KPIs: new tickets, cooking, ready to serve, dishes off sale. Tools: Kitchen Display, KOT History.

MODULE

Menu

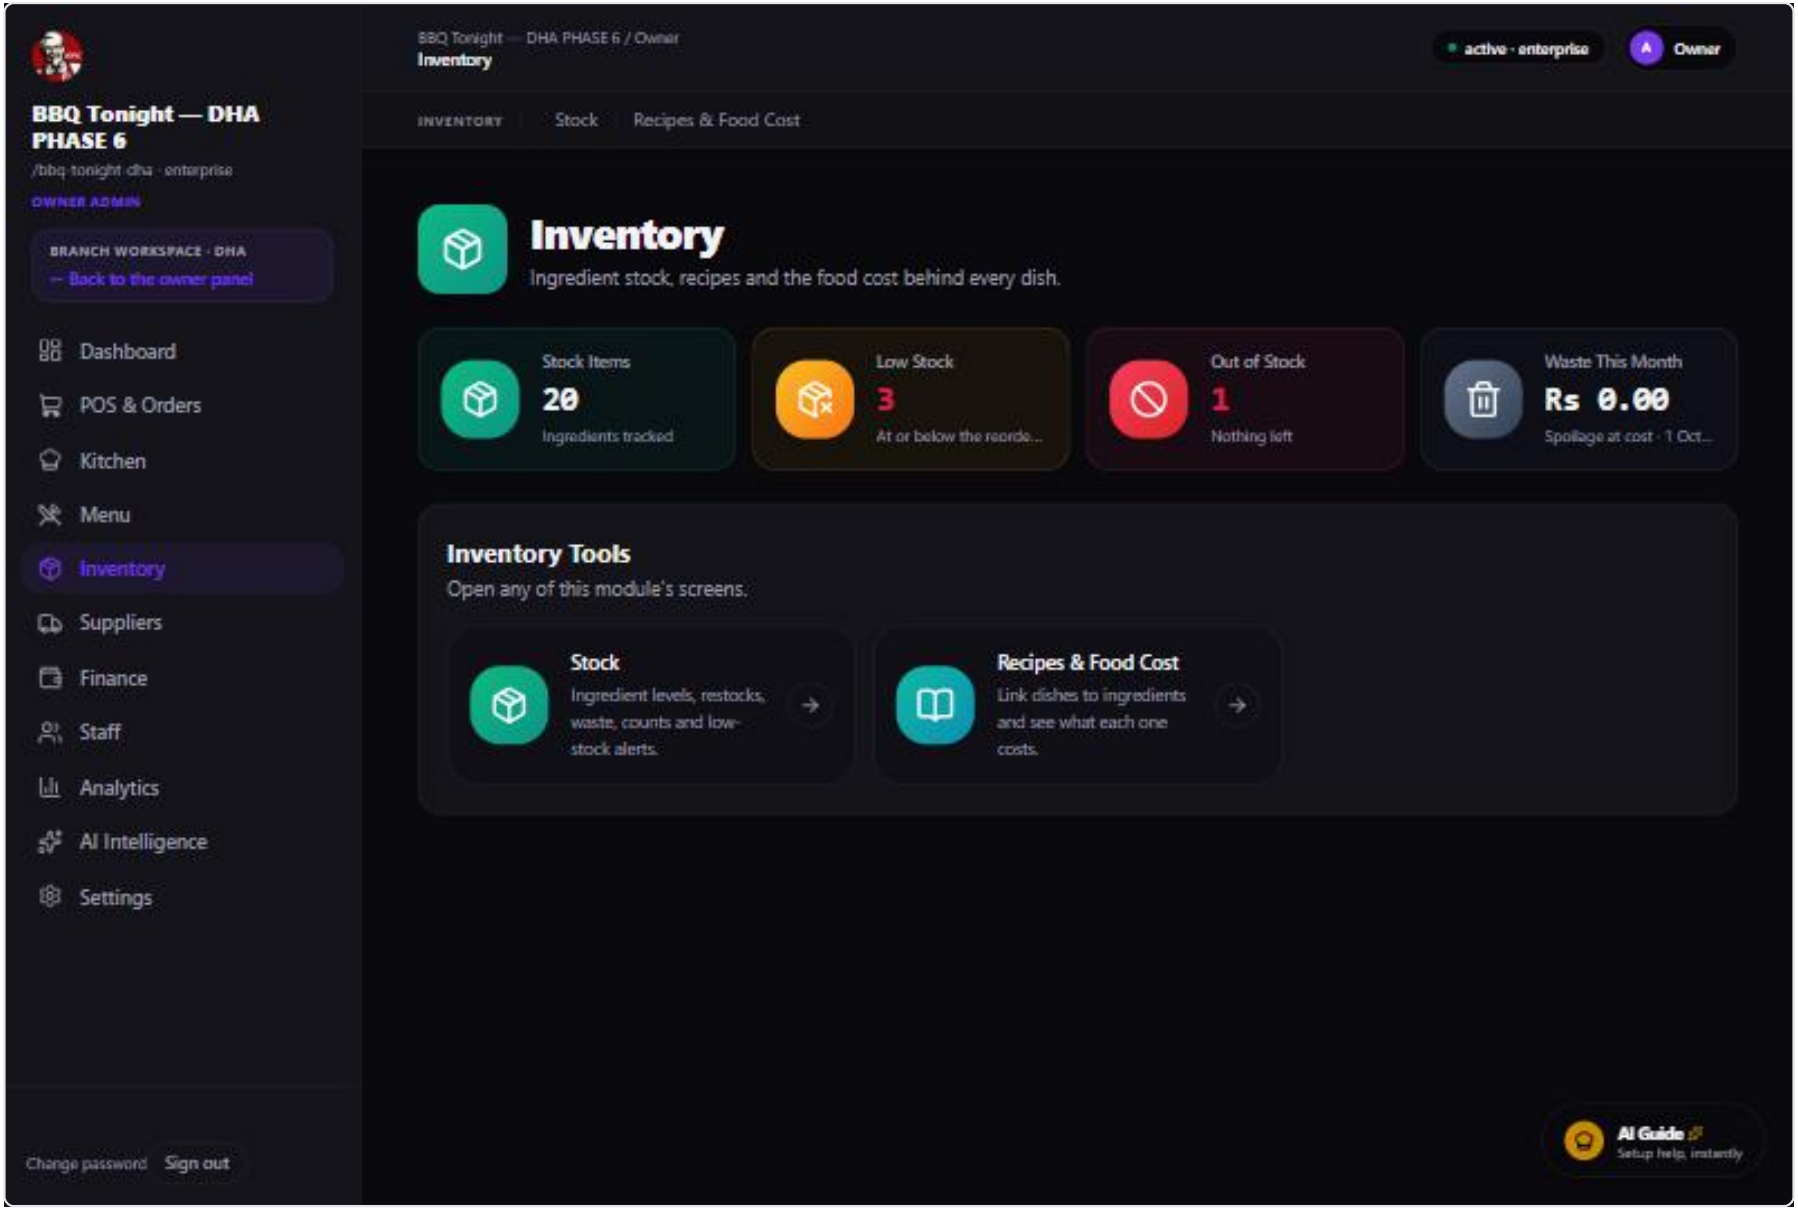

KPIs: menu items, dishes off sale, live deals, active promotions. Tools: Menu Items, Deals & Combos, Promotions, Reviews, Availability History, Priority Allocation, Social Media.

MODULE

Inventory

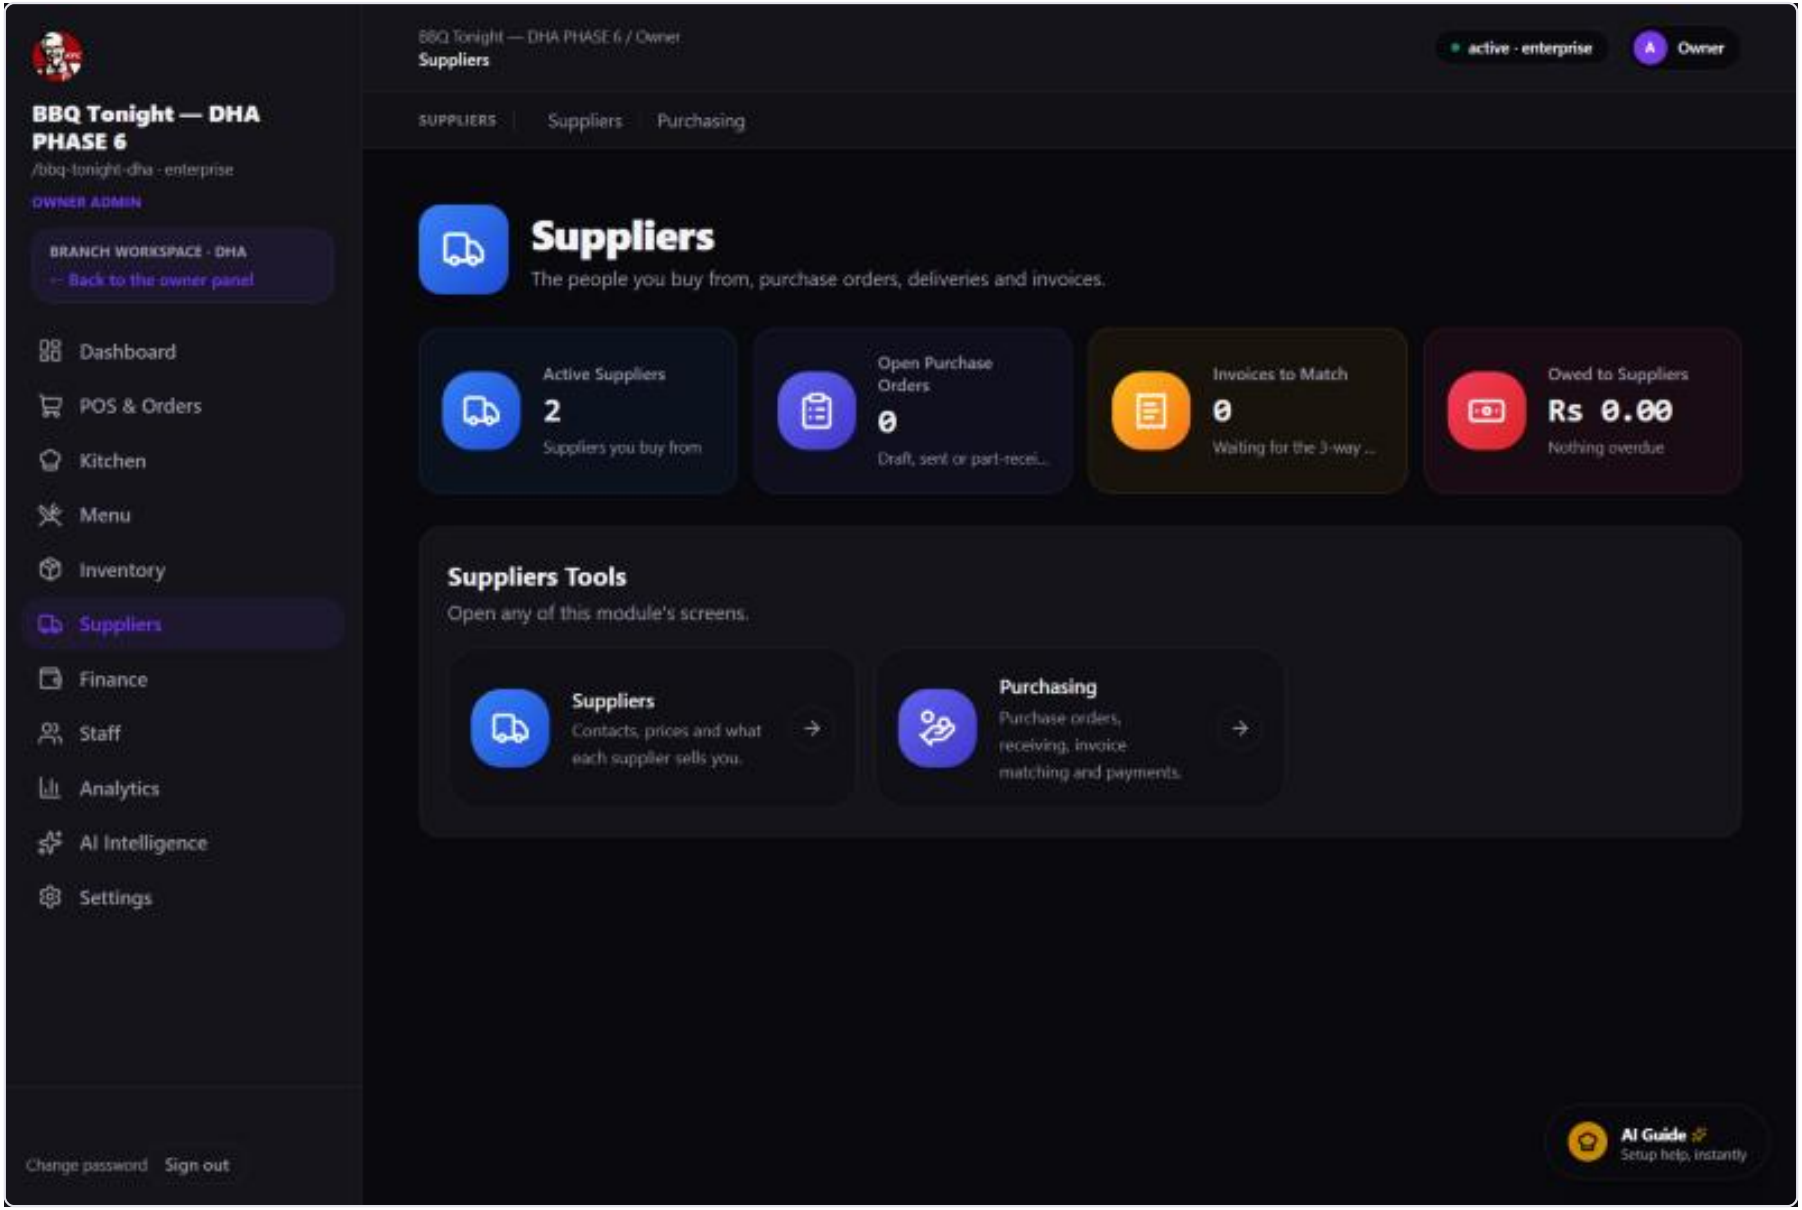

KPIs: stock items, low stock, out of stock, waste this month. Tools: Stock, Recipes & Food Cost.

MODULE

Suppliers

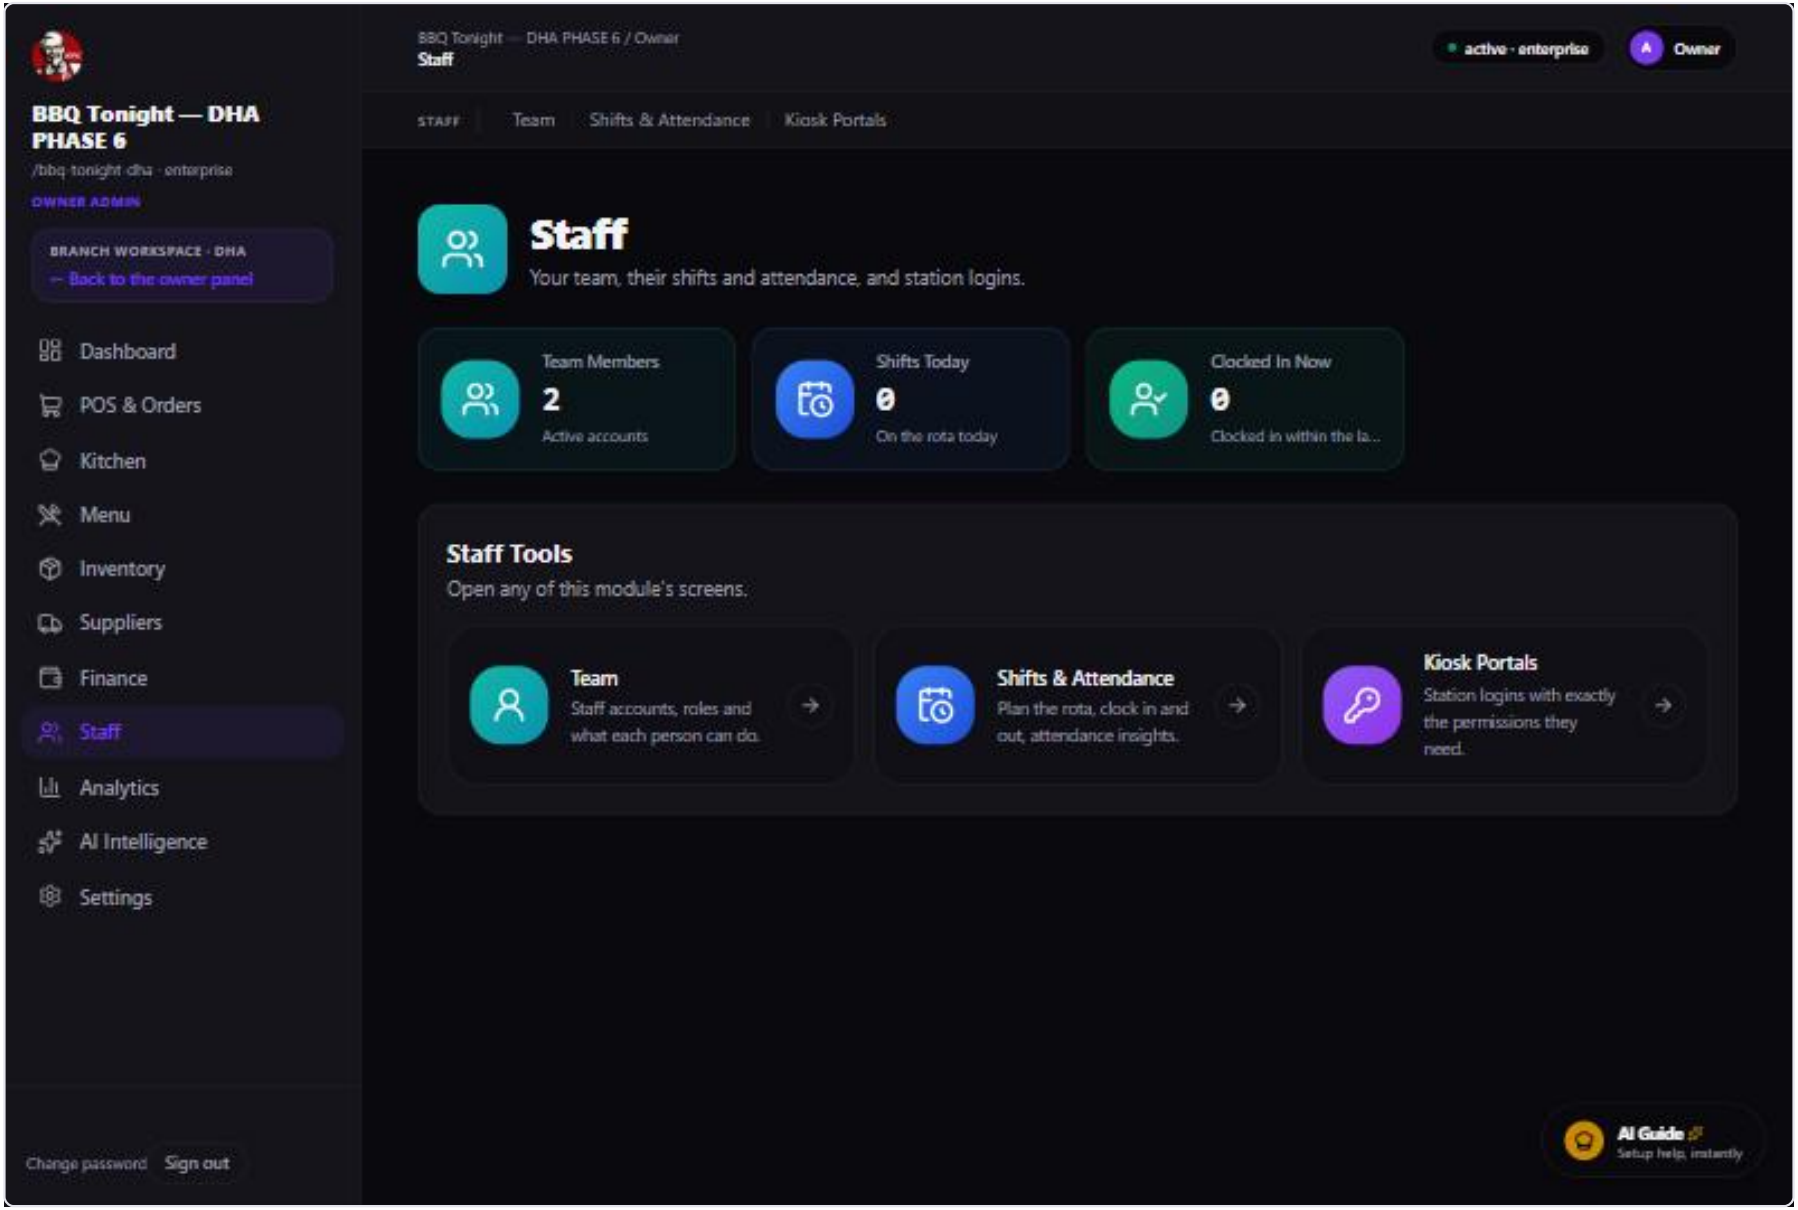

KPIs: active suppliers, open purchase orders, invoices to match, owed to suppliers. Tools: Suppliers, Purchasing.

MODULE

Staff

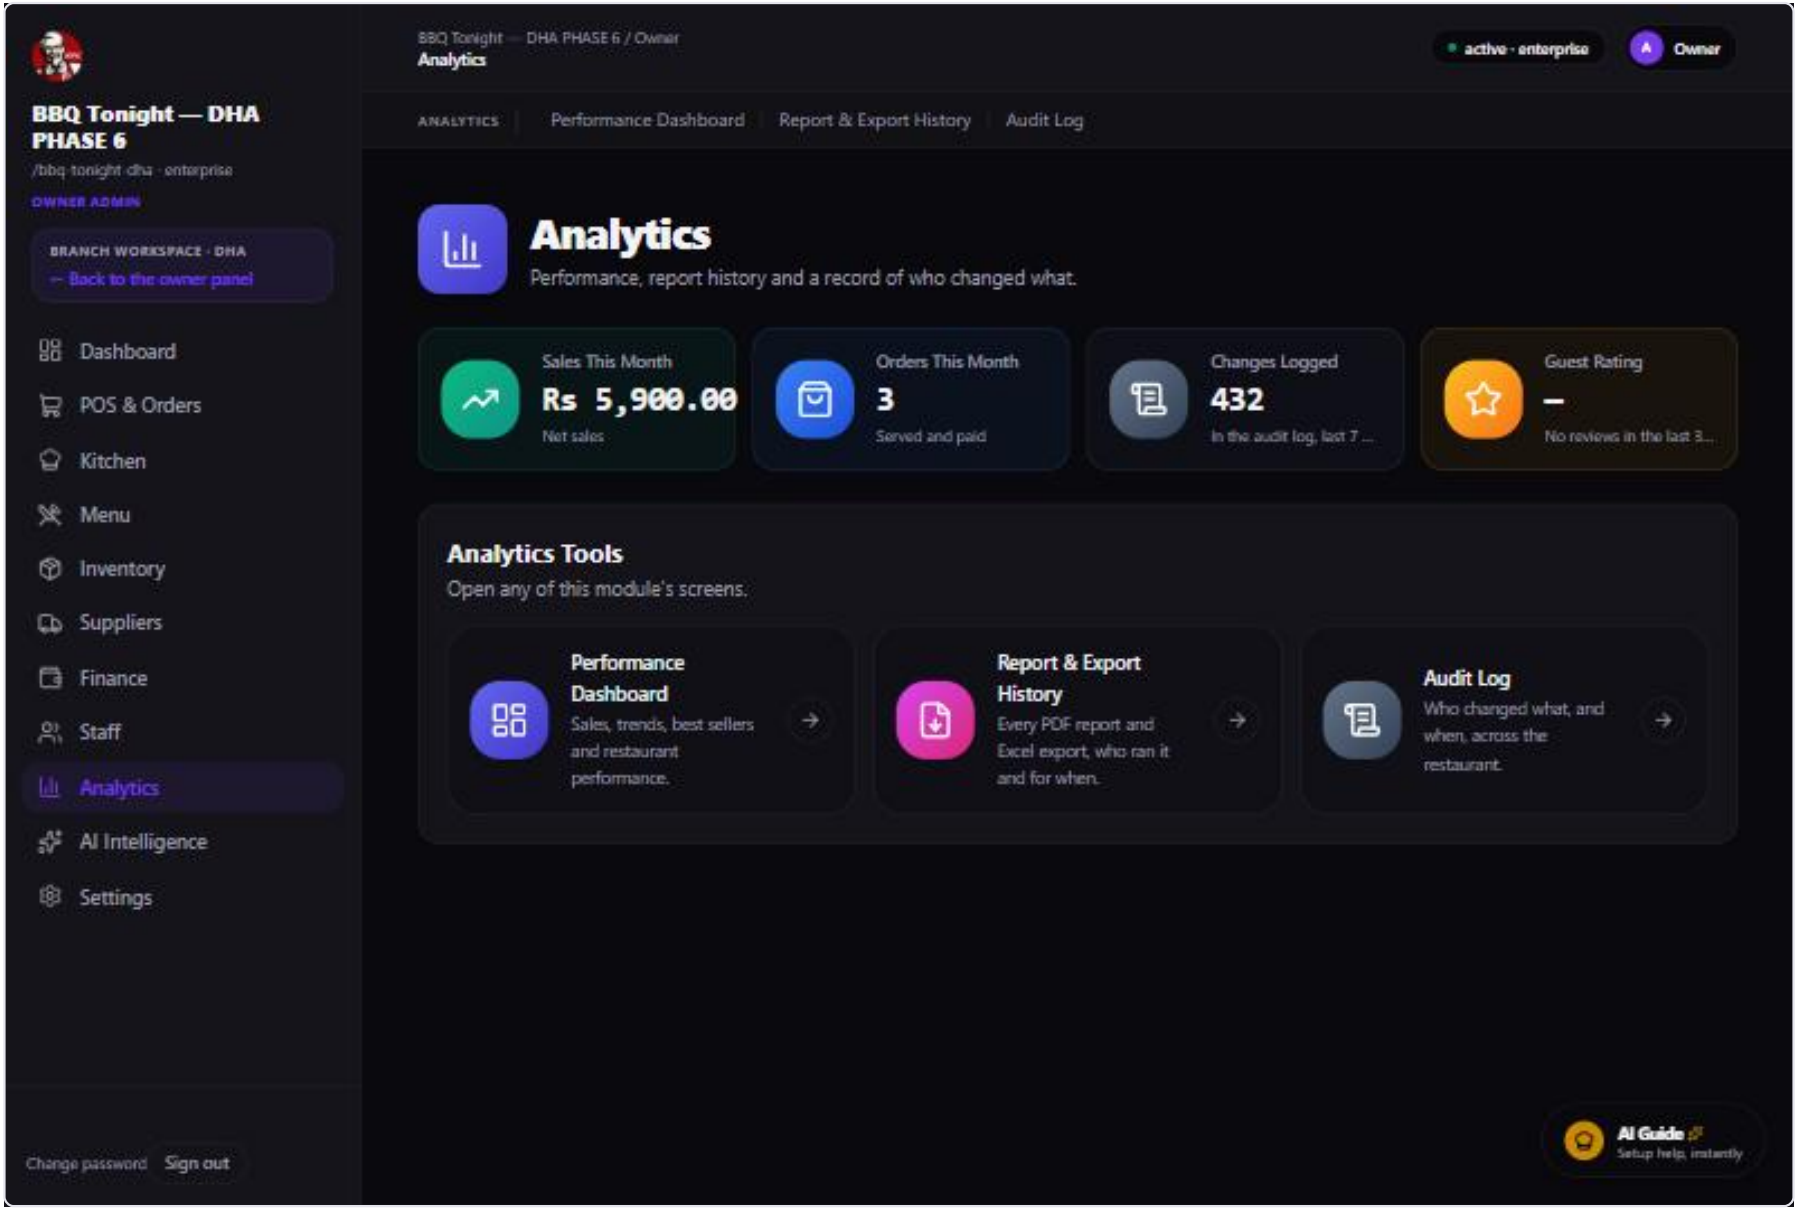

KPIs: team members, shifts today, clocked in now. Tools: Team, Shifts & Attendance, Kiosk Portals.

MODULE

Analytics

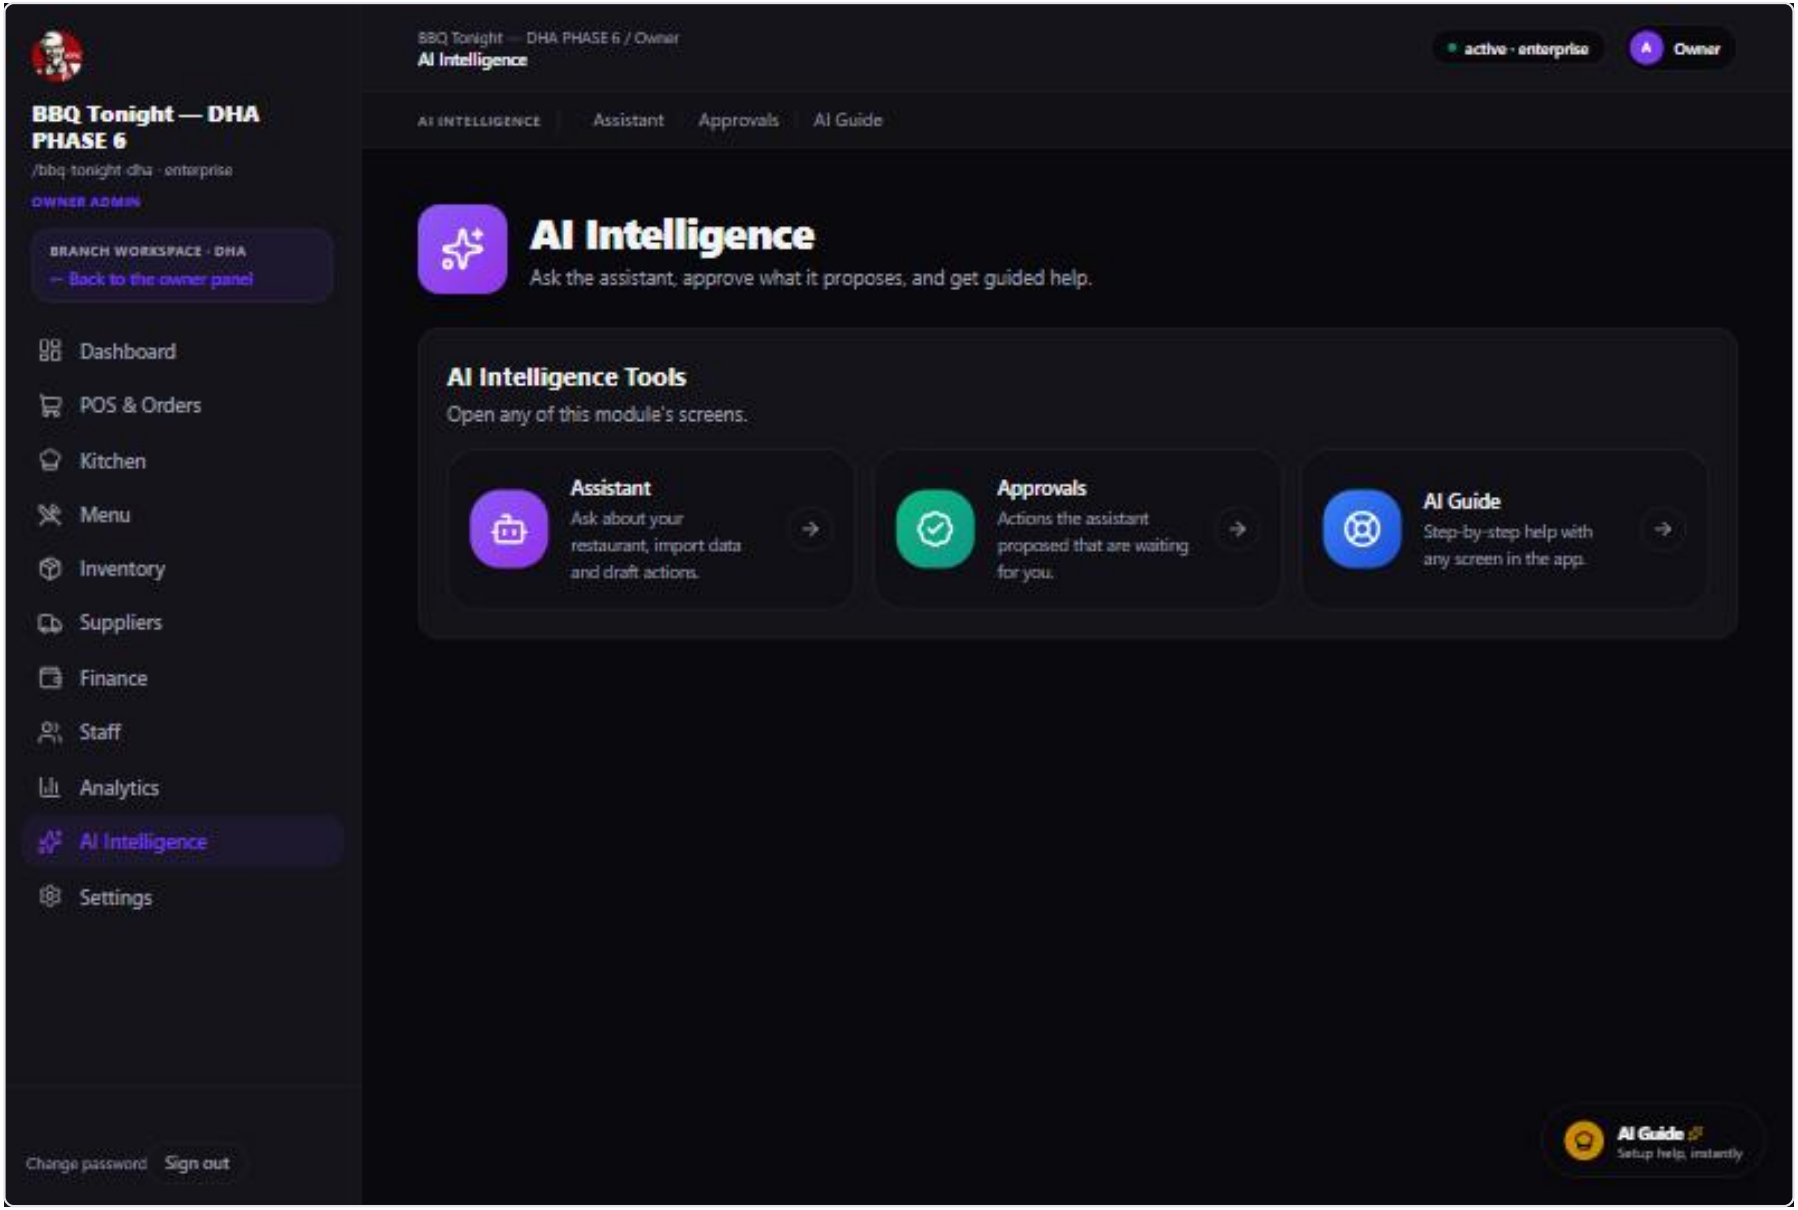

KPIs: sales and orders this month (vs the same days last month), changes logged, guest rating. Tools: Performance Dashboard, Report & Export History, Audit Log.

MODULE

AI Intelligence

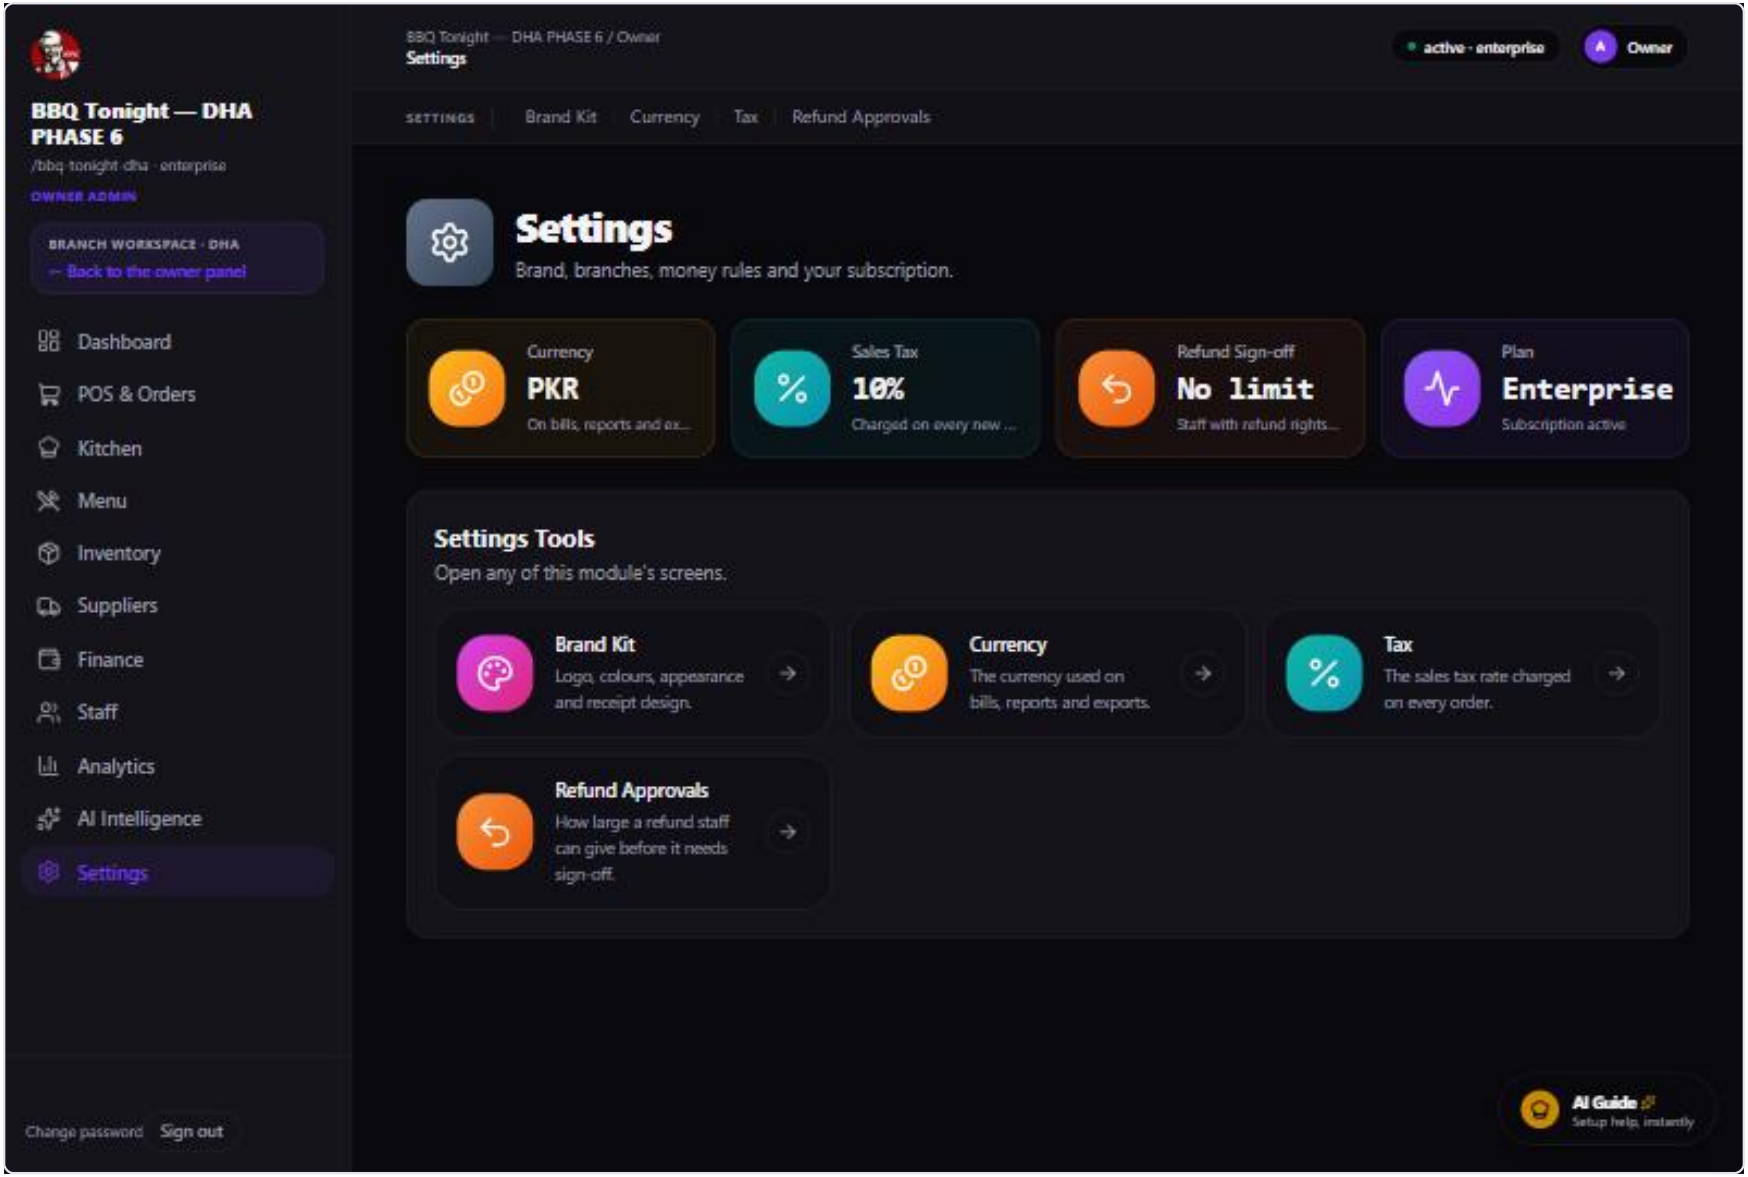

Tools: Assistant, Approvals, AI Guide. No KPI cards here - the assistant's figures come from the separate API server.

MODULE

Settings

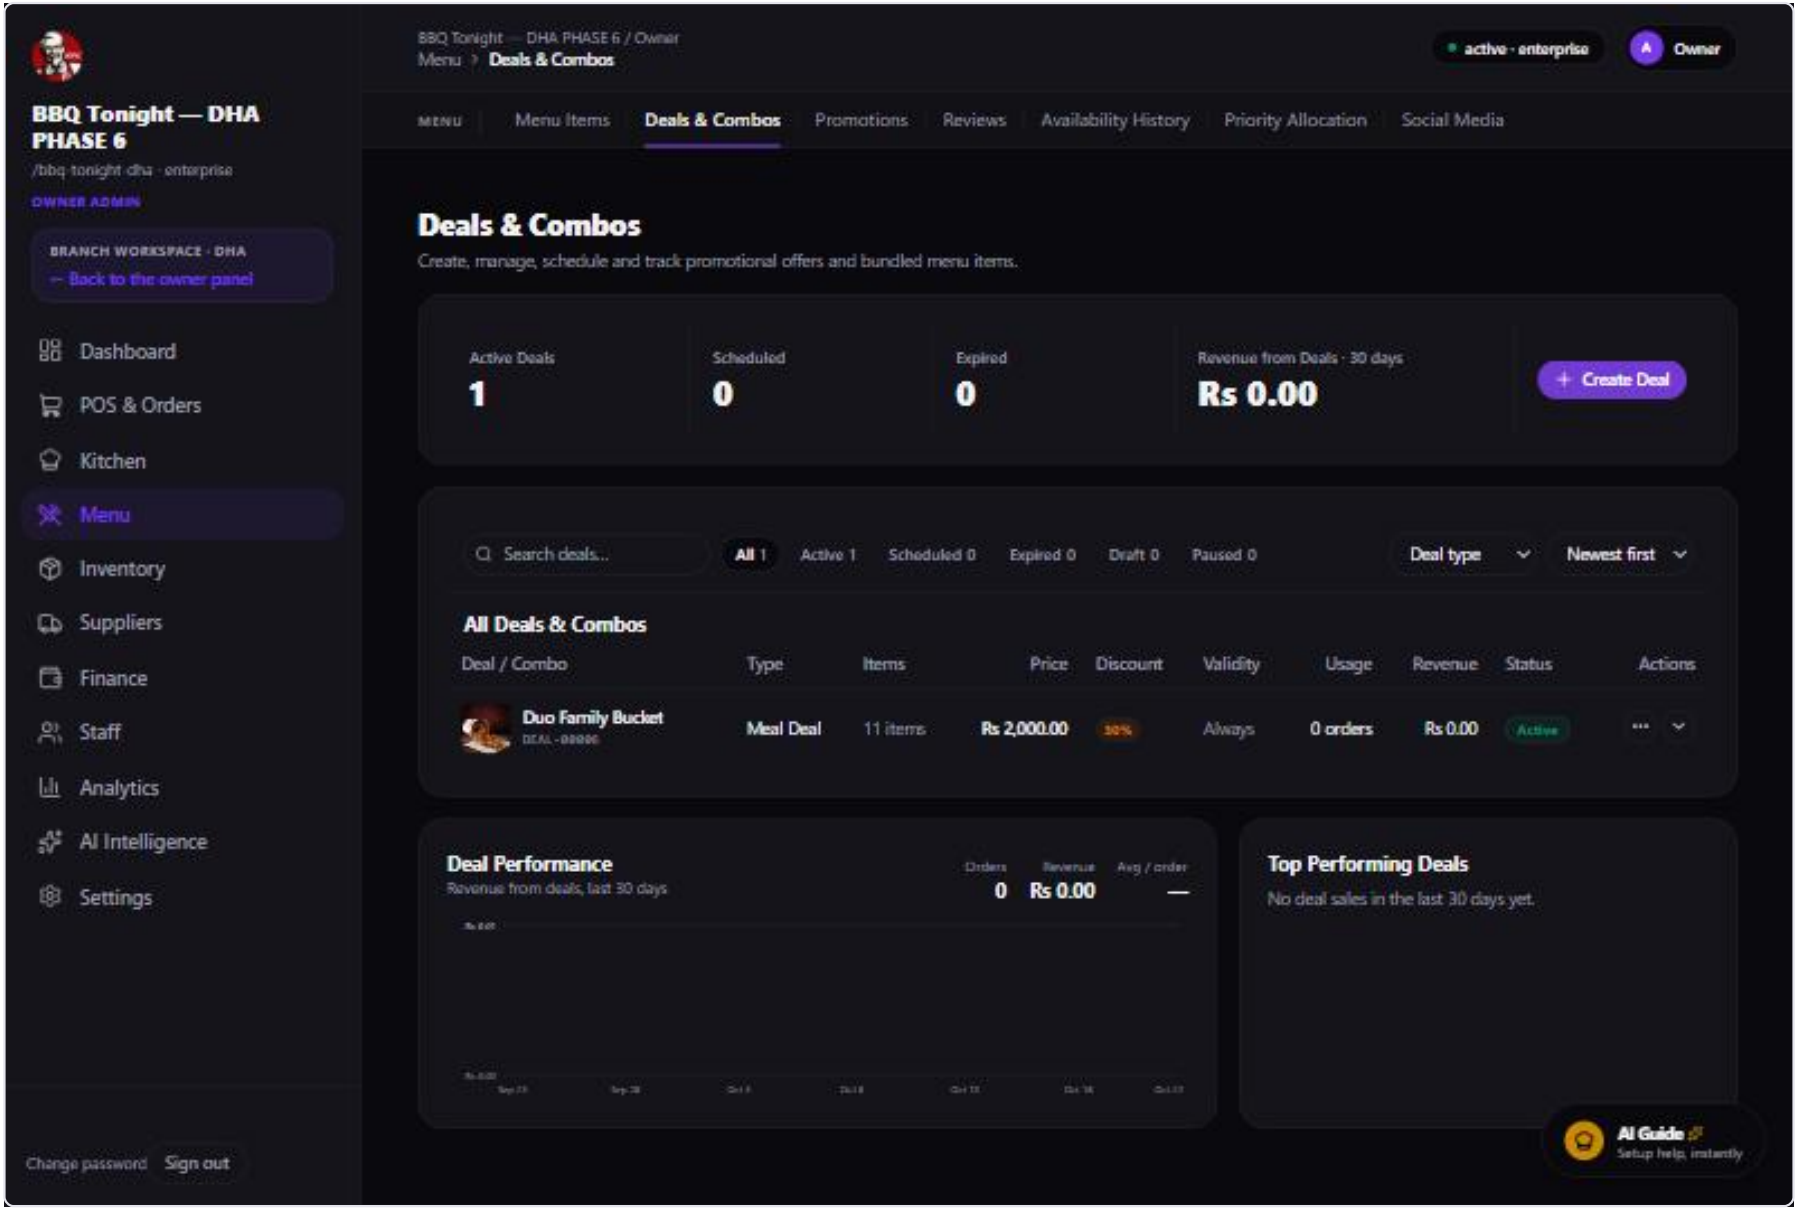

KPIs (owner only): currency, sales tax, refund sign-off limit, plan. Tools: Brand Kit, Currency, Tax, Refund Approvals (Branches and Billing are managed from the main restaurant, so a branch hides them).

SUB-NAVIGATION

A module screen with its bar - Deals & Combos

Every module screen shows its module's bar with the current screen underlined - here the Menu bar on Deals & Combos, breadcrumb Menu > Deals & Combos.

RESPONSIVE

Phone layout

Modules scroll across under the top bar (current module highlighted), followed by the module's sub-navigation; KPI cards and tiles stack. Left: Finance. Right: Menu.
